

METAL CEILING | WALL PANEL | SUN-SHADE SYSTEM

DESCRIPTION

Ballesta® Extruded Aluminum Baffle Ceilings include various styles with many kinds of specifications, which apply to different sites. These kinds of ceilings present a strong sense of continuity and line with an obvious effect of visual guidance. Various baffle heights and spacing distances make the whole ceiling system more open & three-dimensional, which presents modern styles.

This kind of baffle ceilings varies from shapes and designs. It can be curved, cambered, waved, mix-colored, multi-angle combined, freely spliced and etc. Except satisfying the function for use, it also expresses architects' design philosophy and art aesthetics.

The baffle ceilings are strongly adapted to the space no matter big area of public transportation stations, exhibition halls & supermarkets, or small area of office buildings and living houses. Except interior decoration, it also can be widely used outdoors with special windproof structures.
